Talk to your Dentist about what perfect looks like for you

Not just a Clear Aligner Manufacturer...
(There are plenty of those)

We take moving teeth seriously. We don't just make Clear Aligners to create a generic smile, **we go a step further.**

Our Specialists look at your case **holistically** with your Dentist.

We **listen to your story**, what perfect looks like for you, and combine that with aesthetic, functional and dental health components to create a **truly personalized** Treatment Plan.

We use our in-house **expertise** based on our Specialists' experience from **tens of thousands of patients** to ensure you get the results you are looking for.

Not just a generic smile,
a smile that fits you

Custom-made for you, with
precision down to fractions of a
millimetre

What are Clear Aligners?

Clear Aligners are a **modern and subtle** way to move teeth.

They give patients ultimate **flexibility and control**, allowing them to straighten their teeth **invisibly**.

They are **custom-made** to exert small but deliberate forces on specific teeth to move them into the desired final position.

Designing Aligners to achieve perfect aesthetic, functional and health results **requires years of Orthodontic experience and training**, accuracy to fractions of a millimetre, combined with a real understanding of the patient and what they want to achieve.

“Hollywood Smile?”
We’ll make that happen!

(Almost) Invisible Teeth Straightening

Why does my Dentist collaborate with Specialists?

Moving teeth to create a beautiful, healthy, functional smile, **isn't easy**.

Specialist Orthodontists are dentists who have done a minimum of **3 years of additional training** learning the art and science of tooth movement.

32 Stories is the **only company** which allows Dentists to partner with Specialist Orthodontists on your case.

When experts collaborate in dentistry, **amazing things** happen.

So sit back, **you're in great hands**.

A 21st Century Approach to
Cosmetic Dentistry

“Our Dental Partners take moving teeth as seriously as we do, that's why they are collaborating with our Specialist Orthodontists to provide their patients with the highest quality Orthodontic Treatment available”

How does it work?

Once your Dentist has completed the **Specialist Assessment** (bear with them - we need as much info as possible!), we work together to produce a personalised Treatment Proposal.

This is where the hard work is done to meet **your Aesthetic goals**, as well as ensuring **healthy** results which last a **lifetime**.

We work as a team to work around you; if you are planning for a special event, or have specific requirements, we'll ensure your needs are met.

Your Dentist will then explain the Treatment Plan and your **custom-made Clear Aligners** will be with you in no time.

I love my new teeth!

My Dentist worked with
32 Stories and I had an
amazing experience.
Everything was
convenient, and everyone
was so professional.

Thank you!
